**Develop low-fidelity paper prototypes for a banking app and
convert them into digital wireframes using Inkscape**

AIM:

The aim is to construct low-fidelity paper prototypes for a banking app and digitize them into wireframes using Inkscape.

PROCEDURE:

Tool Link: <https://inkscape.org/>

Step 1: Create Low-Fidelity Paper Prototypes

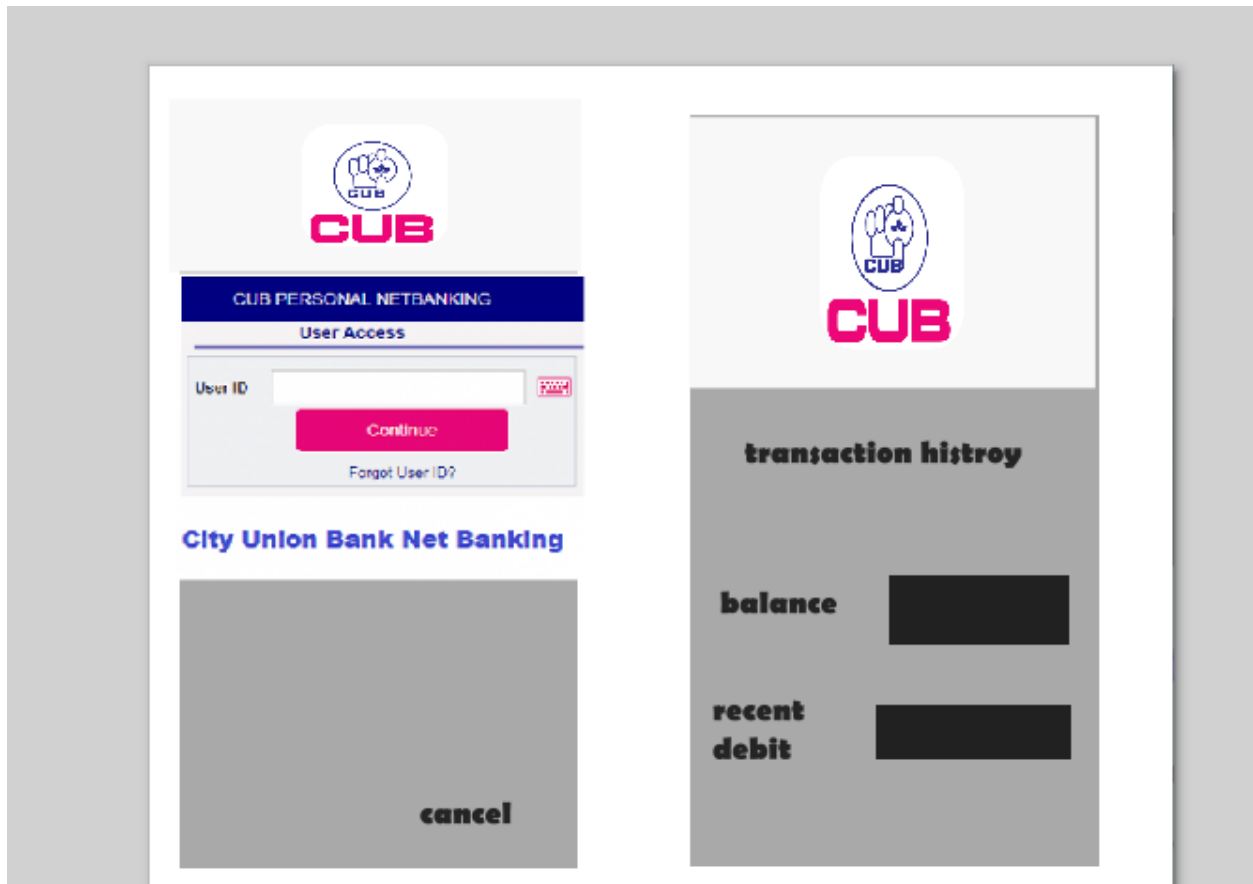

1. Identify Core Features:
 - Determine the essential features of the banking app (e.g., login, dashboard, account management, transfers).
2. Sketch Basic Layouts:
 - Use plain paper and pencils to sketch the main screens.
 - Focus on the primary elements like buttons, navigation menus, and input fields.
3. Iterate and Refine:
 - Get feedback from users or stakeholders.
 - Make necessary adjustments to improve clarity and functionality.

Step 2: Convert Paper Prototypes to Digital Wireframes Using Inkscape

1. Install Inkscape:
 - Download and install Inkscape from the official website.
2. Create a New Document:
 - Open Inkscape and create a new document by clicking on File > New.
3. Set Up the Document:
 - Set the dimensions and grid for your design. Go to File > Document Properties to adjust the size.
 - Enable the grid by going to View > Page Grid.
4. Draw Basic Shapes:
 - Use the rectangle and ellipse tools to draw the basic shapes for your UI elements (e.g., buttons, input fields, icons).
5. Add Text:
 - Use the text tool to add labels and placeholder text to your elements.
6. Organize and Align:
 - Arrange and align the elements to match your paper prototype.
 - Use the alignment and distribution tools to keep everything organized.
7. Group Elements:
 - Select related elements and group them together using Object > Group.
 - This helps keep your design organized and easy to edit.
8. Create Multiple Screens:
 - Duplicate your base layout to create different screens (e.g., login, dashboard, transfer).
 - Use Edit > Duplicate to create copies of your elements and arrange them for each screen.
9. Link Screens (Optional):
 - If you want to show navigation flows, you can add arrows or other indicators to demonstrate how users will move between screens.
10. Export Your Wireframes:

- Once you're satisfied with your digital wireframes, export them by going to File > Export PNG Image.
- Choose the appropriate settings and export each screen as needed.

OUTPUT:

RESULT:

Thus the experiment is executed successfully
